SEO / GEO / AEO Audit Report

FULL AUDIT - all GCC countries

SEO	GEO	AEO
7/10	**6/10**	**6/10**
On Track	*On Track*	*On Track*

Audit date: 2026-10-28

Claude Skill and Plugin by Alex Labat

Executive Summary

Since the 23 October audit the technical base has improved sharply: all 108 sitemap URLs return 200 with unique titles, H1s and descriptions, every page now serves Organization, WebSite and WebPage JSON-LD, 68 country pages carry hreflang, region-less URLs 308-redirect, unknown URLs return a real 404, and Google Analytics is live. The most urgent gap for AI search is depth: crawlers that do not run JavaScript (GPTBot, ClaudeBot, PerplexityBot) still receive only a 76-230 word summary per page, so the six new 900-word 'best CV writing service' guides are invisible to them beyond their first paragraph. The biggest gap for enquiries is trust and reach rather than the website: no reviews are shown, the brand is barely known to Google (searches for 'brandmyprofile' are auto-corrected to 'brand profile'), and the site is not yet registered with Bing, which powers ChatGPT search. Serving full article and service text in the pre-rendered HTML, getting into Bing, and collecting real Google reviews are the three moves most likely to turn visibility into enquiries.

Dimension	Score	Status	Key takeaway
SEO	**7/10**	**On Track**	Clean technical base; long titles/descriptions and JS-only body text remain.
GEO	**6/10**	**On Track**	Entity data and llms.txt in place; AI crawlers see summaries only; no third-party trust signals yet.
AEO	**6/10**	**On Track**	Direct-answer blocks served on homes and CV pages; guide FAQs and FAQ schema not in served HTML.
Combined	19/30		

Method: raw HTML of all 108 live sitemap URLs fetched on 28 Oct 2026, plus robots.txt, llms.txt, redirect, 404, analytics and lead-endpoint checks, compared with the 23 Oct baseline (SEO 6, GEO 5, AEO 5). No headless browser was available, so rendered content, Core Web Vitals, backlinks and actual Bing/AI-engine visibility were not measured; those are named as tools to check. Search Console data supplied by the owner (last 3 months: 60 clicks, 70% from one now-removed sample job page) informs the lead analysis.

Pages Audited

URL	Page type	Notes
/kuwait, /uae, /saudi, /qatar, /bahrain, /oman, /india	Country homepages (7)	Unique titles, cities and answer block in served HTML; hreflang on all
/{region}/services/cv-writing (7)	CV & resume pages	"CV & Resume Writing Services in ..." titles; answer block served
/{region}/services/ats-cv, gcc-cv (8)	ATS / GCC CV pages	"ATS-Friendly CV & Resume Writing in ..." titles
/{region}/services/linkedin-makeover, masterclass, career-guidance (15)	Other services	Unique titles; ~110-word served summaries
/{region}/about, pricing, contact (17)	Core pages	Pricing H1 now names the country; schedule/success-stories noindexed

URL	Page type	Notes
/{region}/cv-writing/{industry} (16)	Industry pages	Unique titles; hreflang only where an equivalent exists
/blog, 5 hubs, 24 articles	Blog	Six new best-service guides; served HTML has ~100 words of each
/resources/gcc-cv-checklist	Resource	Indexable lead-magnet candidate
/robots.txt, /llms.txt, /sitemap.xml	Crawl files	All AI crawlers allowed; llms.txt lacks prices and the new guides
/pricing, /kuwait/does-not-exist	Redirect / 404 tests	308 to /kuwait/pricing; real 404 (fixed since 23 Oct)
/api/geo, /api/lead	Functions	Geo returns KW for a Kuwait visitor; lead endpoint live (400 on empty POST)

GCC Country Comparison

Country	URLs	Observation	Content
Kuwait	18	Full set + buyer guide; strongest Search Console presence	Template+
UAE	17	Dubai-led title, buyer guide	Template+
Saudi Arabia	17	Buyer guide; Riyadh/Jeddah/Dammam copy	Template+
Qatar	16	Doha-led title, buyer guide	Template+
Bahrain	4	Home, CV writing, contact + buyer guide	Thin
Oman	4	Home, CV writing, contact + buyer guide	Thin

SEO Analysis - 7/10

Technical On-Page

Signal	Finding	Status
Titles	108/108 unique; 39 exceed 60 characters (mostly service and blog titles).	Needs Attention
Meta descriptions	108/108 present and unique; 29 exceed 160 characters and will be truncated.	Needs Attention
H1	108 distinct H1s in served HTML, each matching its page (was 1 generic H1 on 23 Oct).	Good
Canonical / robots	Self-referencing canonical on every URL; noindex only on schedule, success stories, legal and sample jobs.	Good
Redirects and 404	Region-less URLs 308-redirect by visitor country; unknown URLs return 404 (both fixed).	Good
Hreflang	68 country pages carry en-KW/en-AE/en-SA/en-QA/en-BH/en-OM/en-IN alternates plus x-default.	Good
Internal links	Every served page links to its region services and to the same page in other regions.	Good

Content Quality

Signal	Finding	Status
Served word count	76-230 words per page (median 110) in pre-rendered HTML; full body text only appears after JavaScript.	Needs Attention
New buyer guides	Six ~900-word "How to choose the best CV writing service in ..." guides with local prices, cities and FAQs.	Good
Freshness	Blog dates in sitemap lastmod; guides dated 23 Oct 2026.	Good

Structured Data

Signal	Finding	Status
JSON-LD in served HTML	Organization (with alternateName, areaServed incl. Bahrain/Oman, sameAs), WebSite, WebPage on all 108 pages.	Good
Page-specific types	Service, FAQPage and BlogPosting are emitted client-side only, not in served HTML.	Needs Attention

GEO Analysis - 6/10

E-E-A-T Assessment

Signal	Finding	Status
Entity clarity	Brand named consistently; alternateName "Brand My Profile" added; Google still auto-corrects the brand to "brand profile".	Needs Attention
Reviews / proof	No reviews or ratings visible; Google reviews feed shows only a link. Zero third-party proof for AI engines to cite.	Missing
Author expertise	Articles by "BrandMyProfile Editorial Team" with no named writer, credentials or experience.	Needs Attention
Contact transparency	Phone/WhatsApp, email and "online, no walk-in office" stated in served HTML and llms.txt.	Good

Content for AI Synthesis

Signal	Finding	Status
Citable facts	Real local prices (e.g. Kuwait 4/7/10 KWD, UAE 58/101/144 AED) and turnaround now on pages and guides.	Good
Depth visible to AI crawlers	GPTBot, ClaudeBot and PerplexityBot receive ~100-word summaries; the guide bodies, FAQs and service detail are invisible to them.	Missing
llms.txt	Present and honest, but omits actual prices, the six best-service guides and package contents.	Needs Attention
Third-party mentions	No evidence of the brand on list articles, directories or forums that AI engines draw from.	Missing

Technical GEO

Signal	Finding	Status
Crawler access	robots.txt allows every agent including AI crawlers.	Good
Bing index	ChatGPT search and Copilot rely on Bing; no sign the site is verified in Bing Webmaster Tools (owner to confirm).	Needs Attention
HTTPS	Enforced with 308 redirects from http and non-www.	Good

AEO Analysis - 6/10

Featured Snippet Eligibility

Signal	Finding	Status
Direct answers	Homepages and CV pages serve "What does a CV writing service in X include?" with a 60-80 word answer.	Good
Pricing answer	"How much does CV writing cost in Kuwait?" answered right under the price cards.	Good
Lists and tables	Package comparison table and checklists exist in the app; not in served HTML.	Needs Attention

Structured Answer Formats

Signal	Finding	Status
FAQ schema	FAQPage on home and pricing is client-side only; guides have FAQs with no FAQ markup.	Needs Attention
Question headings	Guides use natural questions ("Which is the best CV writing service in Kuwait?").	Good
HowTo / speakable	Not used.	Missing

Voice Search Readiness

Signal	Finding	Status
Local phrasing	City names (Kuwait City, Dubai, Riyadh, Doha, Manama, Muscat) in served copy.	Good
Brand query	"brandmyprofile" is auto-corrected by Google, so voice and brand searches miss the site.	Needs Attention

Priority Recommendations

Priority	Issue	Dimension	Effort	Impact
Critical	Pre-render full article bodies and service-page text into the static HTML so ChatGPT, Claude and Perplexity crawlers can read and cite them	GEO / AEO / SEO	Medium	Very high
Critical	Collect and display real Google reviews (finish the Places API setup); ask every client for a review	GEO / Leads	Low	Very high
Critical	Verify the site in Bing Webmaster Tools (import from Search Console) and submit the sitemap; ChatGPT search uses Bing	GEO	Low	High
High	Get listed on "best CV writer in Kuwait / Dubai / Riyadh / Doha" list articles and GCC directories	GEO / SEO	Medium	High
High	Expand llms.txt with prices, package contents, turnaround and links to the six buyer guides	GEO	Low	Medium
High	Resolve the package-content conflict between the Pricing and CV Writing pages before customers rely on either	Leads	Low	High
High	Mark lead_submit_success, whatsapp_click and contact_submit as GA4 key events and review weekly	Leads	Low	High
Medium	Name the writer(s) on articles with real experience, and add an author section to About	GEO	Low	Medium
Medium	Add FAQPage JSON-LD for guide FAQs and serve it in static HTML	AEO	Low	Medium
Medium	Shorten the 39 titles over 60 characters and 29 descriptions over 160	SEO	Low	Low
Quick Win	Use the exact name "BrandMyProfile" with a link on every profile (Business Profile, LinkedIn, Instagram, Bayt) to stop the brand auto-correct	GEO	Low	Medium
Quick Win	Run PageSpeed Insights on /kuwait and the pricing page (Core Web Vitals not measurable here)	SEO	Low	Medium

What's Working Well

Clean technical foundation	108/108 pages return 200 with unique titles, H1s, descriptions and canonicals; soft 404 and region-less duplicates fixed.
Structured entity data on every page	Organization, WebSite and WebPage JSON-LD in served HTML, with sameAs and areaServed across 6 GCC countries plus India.
Country targeting	Hreflang on 68 pages and country-specific titles such as "CV Writing Services in Dubai & UAE" and "...in Doha, Qatar".
Buyer-intent content	Six honest best-service guides with real local prices, cities and FAQs.
Measurement in place	Google Analytics (G-104GJYGCBH) with consent, plus a working lead endpoint and WhatsApp tracking.
AI-ready files	robots.txt allows all crawlers and llms.txt clearly states services, regions and limits.

Glossary

Term	Meaning
SEO	Search Engine Optimization: ranking in Google and Bing results.
GEO	Generative Engine Optimization: being understood and cited by AI answers (ChatGPT, Gemini, Claude, Perplexity).
AEO	Answer Engine Optimization: structuring content as direct answers for snippets and voice.
Pre-rendering	Putting a page's text into the HTML the server sends, so crawlers that do not run JavaScript can read it.
Bing Webmaster Tools	Microsoft's Search Console equivalent; ChatGPT search draws on the Bing index.
